Breeder (f/m/d) for insect resistance in Sugar Beet

Do you like to work on innovative topics, are familiar with breeding and like to work in an international environment? Then you need to become part of our sugar beet resistance breeding group at KWS SAAT SE & Co. KGaA in Einbeck, Germany.

Your tasks:

- Development of variety components with resistances to insects
- Evaluation and interpretation of screenings of KWS germplasm and genetic resources in field and greenhouse environments
- Optimization of breeding schemes including the integration of genomic selection and molecular markers
- Takeover of budget and personnel responsibility
- Collaboration in an international team of breeders and researchers and in strategic initiatives towards insect resistance across crops

About KWS

KWS is one of the world's leading plant breeding companies. With the tradition of family ownership, KWS has operated independently for more than 160 years. It focuses on plant breeding and the production and sale of seed for corn, sugar beet, cereals, potato, rapeseed and sunflowers. KWS uses leading-edge plant breeding methods. 5.147 employees represent KWS in more than 70 countries.
